

FDNY MSOC 2017

May 4 - 7, 2017

5th Annual FDNY Medical Special Operations Conference

Celebrating its fifth year, the FDNY Medical Special Operations Conference (MSOC) continues to serve as an important venue for military, federal, state and local medical operators and planners to share their experiences. MSOC provides an opportunity for first responders to learn from other stakeholders to obtain insights from experts in the field on how to improve the response framework within the medical special operations community.

MSOC takes place at the FDNY Fire Academy and other locations in New York City. The Conference consists of workshops, lectures, panel discussions, hands-on skills stations, and a vendor showcase featuring the latest equipment and products. The Conference is a partnership between the Fire Department of the City of New York and the FDNY Foundation. Check the website (www.fdnipro.org/msoc) for more information.
